NĀCA RUCAVA

OTANKI · JŪRMALCIEMS · BERNĀTI · DUNIKA · PAPE

The beautiful gardens of Nica

The beauty and magic that every resident of Nica and the surrounding area is proud of can be found in the beautiful, well-kept gardens of Nica and its backyards, which are an opportunity for everyone to experience the hidden magic and harmony of a garden by making an appointment in advance. There are 3 gardens open to the public: "Kristapī", "Sipoli" and "Eldorado". The gardens are open from May to September.

Nature Park in Bernāti

Every nature lover can explore 7 nature trails in the park. Climb and gaze at the treetops from a lookout tower shaped like a boat, cross a bridge with expressive characters waiting at each end or just have a peaceful picnic in one of the landscaped areas.

Mini ZOO "Atomī"

Mini zoo is an opportunity to see and get to know both familiar and unusual animals, as well as to cuddle and feed them with food bought at the zoo. The zoo is home to African ostriches, African lemur, donkeys, families of llamas and red deer, Dutch pygmy goats, wallabies, porcupines, and many other pets. A playground is available for children.

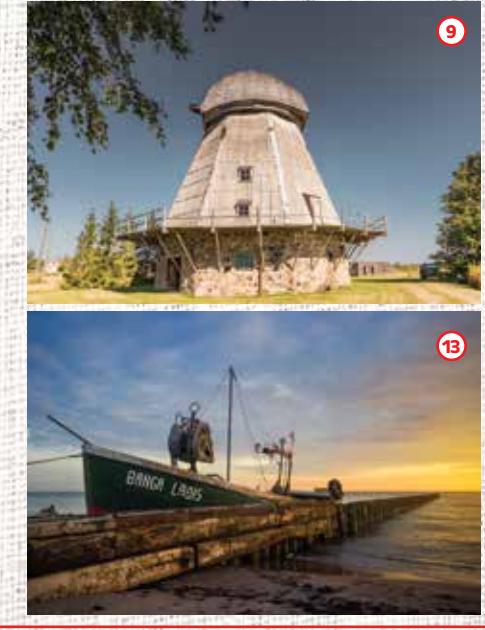

Prenclavu Windmill

Prenclavu windmill is one of the largest windmills in Latvia, built on the model of Dutch windmills, with six wings and four grinding hoods or runners. Both the mill itself and its machinery have been preserved in their former appearance. Prenclavu Mill is a national architectural monument. The mill can be visited by a previously made appointment.

Jūrmalciems pier

The wooden Jūrmalciems pier, built in 1938, is the only one of the piers built on the coast of Kurzeme during the Latvian period that is still in use. Today, the pier is still used by local fishermen and several fishing crews regularly go to sea.

Dunika bog trail

One of the most surprising places in Dunika parish is Dunika Bog, which is crossed by a 5.3 km long footbridge, trail with several resting places created by JSC "Latvijas valsts meži". On the southern side of the marsh grows a stand of Lukne hornbeam. This is the only place in Latvia where hornbeam has been planted on a large scale on an area of 11 ha. It has reached the north-western limit of its distribution in Lukne.

FEEL IT FOR REAL

Nature Park Pape

The nature park was established in 2004 to protect a natural area important for the conservation of migratory and breeding bird populations. In 1999, the World Wildlife Fund introduced the first wild horse herds to Lake Pape. A little later, tamed ponies and foals were introduced. The most popular attraction of the nature park is the wild herbivore pastures on the Eastern shore of Lake Pape.

Open-air museum "Vitolnieki" in the Papes Konu village.

The Farmstead "Vitolnieki" is a branch of the Ethnographic Open-air Museum of Latvia in Pape. It houses a collection of ancient tools and household objects. The farm is located in the Papes Konu village, which is a unique historical fishing village - one of the rare pearls not only in Latvia, but in the whole European context. It has preserved ethnographic and building habits that have been lost elsewhere.

MINI ZOO "ATOMI"

Mini zoo is an opportunity to see and get to know both familiar and unusual animals, as well as to cuddle and feed them with food bought at the zoo. The zoo is home to African ostriches, African lemur, donkeys, families of llamas and red deer, Dutch pygmy goats, wallabies, porcupines, and many other pets. A playground is available for children.

Rucava Evangelical Lutheran Church

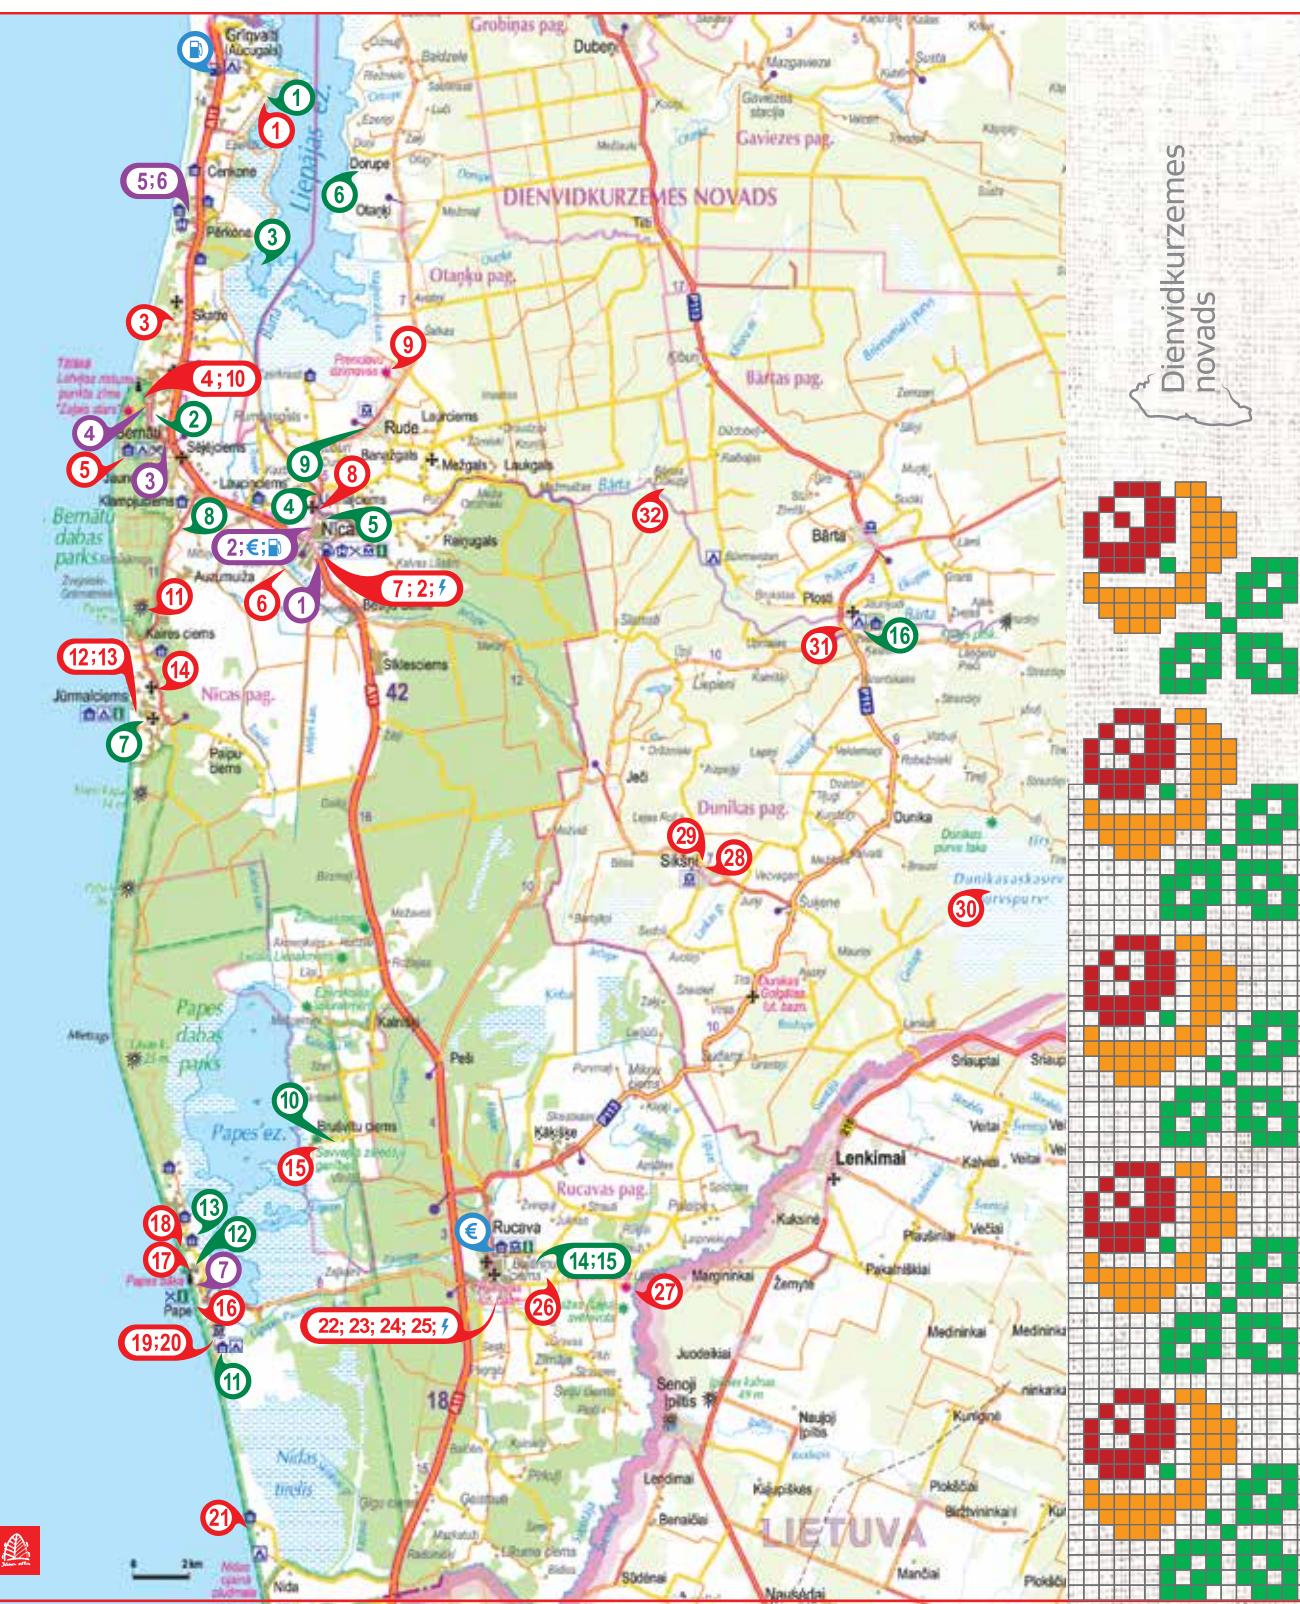

The project to establish an arboretum started in 1936. The most suitable places for planting were Mārupīte valley and forest adjacent to the school. In the following years, planting was also carried out in the centre of Rucava. The manager of the arboretum is dendrologist Ināra Borda. The Latvian Olympic Club has also made a significant contribution to the planting, and through its work together with the author and his pupil Primary School Primary School. It is implementing the international project "Olympic olive branch", traditionally expanding the planting before the Olympic Games.

Rucava Arboretum

The project to establish an arboretum started in 1936. The most suitable places for planting were Mārupīte valley and forest adjacent to the school. In the following years, planting was also carried out in the centre of Rucava. The manager of the arboretum is dendrologist Ināra Borda. The Latvian Olympic Club has also made a significant contribution to the planting, and through its work together with the author and his pupil Primary School Primary School.
